San Juan, Argentina • aleotinano.netlify.app • +54 9 264 677-9473 • alejandrootinano2@gmail.com

*Frontend developer with over **2 years of experience** building web interfaces and **1 year working at a startup as the sole frontend developer**. Specialized in creating clear, scalable interfaces with a strong focus on user experience, component reusability, and code maintainability. Experienced in modern JavaScript ecosystems, integrating design and logic to deliver functional and scalable products..*

## Professional Experience

### Ansser – Management Software (Startup)

Frontend Developer

Argentina

Jun 2025 – Nov 2025

- Sole frontend developer responsible for building the interface of an enterprise management platform (inventory, orders, etc.) composed of **9 modules**.
- Implemented a **scalable modular architecture**, optimizing performance through lazy loading, caching, and efficient rendering, supporting **2,000+ simultaneous orders** without impacting user experience.
- Led frontend technical decisions, building administrative dashboards and managing complex state using **12+ Context APIs**.
- Developed order export functionality to **Excel** with filters by date, product, and other business criteria.
- Worked closely with the backend developer to integrate APIs built with **FastAPI**.
- Used **Git and GitHub** for version control, testing, and direct production deployments.

### Kokomi – Management Software (Startup)

Frontend Developer

Argentina

Feb 2025– May 2025

- Developed the initial **proof of concept** for the “Kokomi” project, defining the base architecture and business workflows later used in Ansser.
- Implemented a complete **CRUD system** for four main modules: products, delivery drivers, orders, and cities.
- Built reusable components (modals, tables, sliders) and implemented authentication with protected routes.
- Added Excel export functionality and state management using **Context API**, establishing the architectural foundation for the production system.

### Valeant – Desktop Application (Startup)

Desarrollador Frontend

Argentina

Mar 2025 – Apr 2025

- Developed a **cross-platform desktop application** using Electron for centralized user and network configuration (proxies).
- Designed and implemented the UI/UX from scratch, focusing on clarity and ease of use with a modular, scalable component architecture.
- Desarrollo de componentes reutilizables (modales, tablas, sliders) y sistema de autenticación con rutas privadas.

## **Education**

---

### **Self-Taught Training**

Self-directed learning through online courses, official documentation, and personal projects, with a strong focus on continuous learning and practical application of modern JavaScript technologies.

**Argentina**

*2023 - Present*

## **Additional Skills**

---

- **Personal Projects:** Web portfolio built with Astro and Framer Motion ([aleotinano.netlify.app](https://aleotinano.netlify.app)), e-commerce platform (Huella), and restaurant management software (DaFood).
- **Technologies:** HTML, CSS, JavaScript, React, Astro, Tailwind CSS, Framer Motion, Electron, Git, GitHub, Vite, npm, pnpm, CSS Modules, Context API, Responsive Design,
- **Languages:** Spanish (Native), English (Basic).
